Rh

—
RHODIUM

EXPERT PURCHASE SERVICE

BENEFITS

The Expert purchase service enables you to take advantage of specific moments of opportunity in the market. It is **created according to estimations of how the market will evolve** which, a priori, can offer advantages when it comes to buying or carrying out a subsequent sale.

The minimum and maximum amounts, as well as the type of metal, will be determined by the market situation. If you clear about it, this is your service for an opportunity..

CONTRACTING IN 3 STEPS

1 DESIGN OF PLANNED ACQUISITION

Throughout the year we launch a large number of Expert purchase contracts based on different investment metals, with different durations and always in accordance with estimations of how the market will evolve.

We support you at all times so you can decide the most interesting option according to your interests and activate the purchase.

2 EXPERT PURCHASE ACTIVATED

The contracting procedures begin with an **Order Form** and the required documentation. Once the contract has been signed, you have 5 working days to carry out the bank transfer for the amount of your purchase.

Within a maximum period of 30 working days you will receive the **Annex** with the details of your metal assignment duly identified.

3 YOUR METAL, DULY PROTECTED

For greater security, the metal purchased will be deposited at a first-rate security company during the term of the contract.

CLARITY AND TRANSPARENCY

FLEXIBILITY

Each issue, depending on the market situation and the metal being purchased, will entail a minimum and maximum purchase amount which will be determined prior to the purchase request.

COMMITMENT

If no buyer has been found for your metal on the expiry date of the contract, SilverGold Patrimonio pledges to purchase the metal covered by the contract for its own inventory. In this case the reference price will be the one set on Invermoneda -5%.

QUALITY AND TRANSPARENCY

At SilverGold Patrimonio we only work with precious metals in the form of ingots or bullion coins. All the metal comes from the world's most prestigious Mints and the most renowned refineries in the sector. The minimum purity of our metals is:

- › **GOLD & SILVER:** 999,99
- › **PLATINUM & RHODIUM:** 999,5
- › **PALLADIUM:** 995

TAXATION

Price revaluations obtained through the purchase and sale of metals covered by the contracts are subject to capital gains tax. Each year, you will be sent a tax assessment with the summary of purchase and sale transactions for the purposes of fulfilling the corresponding tax obligations.
